

**Oxyclean Detergent** By Peggy Stolfus on Wednesday, February 5, 2014 at 9:13am

HOMEMADE DETERGENT~COST EFFECTIVE

The ingredients are as follows.

2 3 lb containers of oxy clean or store brand (they were out of store brand so had to get name brand),

1 3 lb box of arm&hammer super washing soda,

1 4 lb box of arm&hammer baking soda (I had to get 2 2 lb boxes since the store did not have the 14 lb box),

1 4 lb box of borax and

1 box of zote soap flakes (2 bars)

I added purex crystals for added fragrance. But next time I will most likely not get them as the zote soap has a fresh lemon scent. it takes 1-2 TBS per load.

It cost 30.43 for all the ingredients. It made 596 dry oz that equal 250 Tablespoons that breaks down to 250 loads at .12 cents a load.
